

## **Table of Contents**

- 1:Max Perutz, John Kendrew, Peterhouse and the Davy-Faraday Research Laboratory
- 2:The Birth and Initial Exploitation of X-ray Diffraction
- 3:W. H. Bragg and his Creation of a World-Famous Centre for X-ray Crystallography at the Davy-Faraday Research Laboratory
- 4:A Dispute Between the Cavendish and Caltech: The Emergence and Ubiquity of the Alpha Helix
- 5:Perutz and Kendrew: The Heroic Era of Structural Molecular Biology
- 6:Sir Lawrence Bragg at the RI (1953-1966) and the Determination of the First Three-Dimensional Structure of an Enzyme at the DFRL (1965)
- 7:Lawrence Bragg and Linus Pauling: Comparisons and Rivalries
- 8:Biographical Sketches
- 9:Contributions of Cambridge College Life to Structural Biology: Peterhouse as an Exemplar
- 10:The Summing Up: The Astonishing Successes of the LMB, and the Dawn of a New Structural Biological Era
