

Contents

Preface, vii

Modeling Brain Disorders Using Induced Pluripotent Stem Cells, 1

Krishna C. Vadodaria, Jeffrey R. Jones, Sara Linker, and Fred H. Gage

Brain Organoids: Human Neurodevelopment in a Dish, 15

Silvia Benito-Kwiecinski and Madeline A. Lancaster

Toward Combined Cell and Gene Therapy for Genodermatoses, 33

Laura De Rosa, Maria Carmela Latella, Alessia Secone Seconetti, Cecilia Cattelani, Johann W. Bauer, Sergio Bondanza, and Michele De Luca

Development of Stem Cell Therapies for Retinal Degeneration, 59

Emma L. West, Joana Ribeiro, and Robin R. Ali

Next-Generation Biomaterials for Culture and Manipulation of Stem Cells, 83

Koichiro Uto, Christopher K. Arakawa, and Cole A. DeForest

A Synthesis Concerning Conservation and Divergence of Cell Types across Epithelia, 101

Daniel T. Montoro, Adam L. Haber, Jennifer E. Rood, Aviv Regev, and Jayaraj Rajagopal

A Stem Cell Approach to Cure Type 1 Diabetes, 115

Aharon Helman and Douglas A. Melton

Direct Lineage Reprogramming: Harnessing Cell Plasticity between Liver and Pancreas, 125

Silvia Ruzittu, David Willnow, and Francesca M. Spagnoli

Stem Cell DNA Damage and Genome Mutation in the Context of Aging and Cancer Initiation, 143

Lara Al zouabi and Allison J. Bardin

Niche Cells and Signals that Regulate Lung Alveolar Stem Cells In Vivo, 163

Nicholas H. Juul, Courtney A. Stockman, and Tushar J. Desai

Discovering New Progenitor Cell Populations through Lineage Tracing and In Vivo Imaging, 177

Rudra Nayan Das and Karina Yaniv

Contents

Specification of the First Mammalian Cell Lineages In Vivo and In Vitro, 203

Melanie D. White and Nicolas Plachta

Advancing Stem Cell Research through Multimodal Single-Cell Analysis, 227

Iwo Kucinski and Berthold Gottgens

Capturing Stem Cell Behavior Using Intravital and Live Cell Microscopy, 249

Arianna Fumagalli, Lotte Bruens, Colinda L.G.J. Scheele, and Jacco van Rheenen

Mouse Spermatogenesis Reflects the Unity and Diversity of Tissue Stem Cell Niche Systems, 269

Shosei Yoshida

Tracing the Dynamics of Stem Cell Fate, 289

Lemonia Chatzeli and Benjamin D. Simons

Index, 309
