PART I Introduction to Motor Behavior 1

CHAPTER 1	Evolution of a Field of Study	3
	Understanding Movement	4
	Origins of the Field	5
	Summary	21
CHAPTER 2	Methodology for Studying Motor Performance	23
	Classification of Motor Skills	23
	Basic Considerations in Measurement	26
	Measuring Motor Behavior	28
	Measuring and Evaluating Relationships	48
	Reliability and Individual Differences	54
	Summary	55
CHAPTER 3	Human Information Processing	57
	Information-Processing Model	57
	Three Stages of Information Processing	58
	Anticipation	78
	Signal-Detection Theory	85
	Memory	88
	Summary	93
CHAPTER 4	Attention and Performance	95
	Types of Attention	95
	Theories of Attention	98

Competition for Attention	101
Attention During Movement	112
Focus of Attention	119
Automaticity: The Constrained Action Hypothesis	123
Attention and Anxiety	124
Summary	125

PART II Motor Control 127

CHAPTER 5 Sensory and Perceptual Contributions to Motor Control 129

Closed-Loop Control Systems	129
Vision	130
Audition	146
Proprioceptors	146
Proprioception and Motor Control	151
Feedforward Influences on Motor Control	161
Summary	166

CHAPTER 6 Central Contributions to Motor Control 169

Open-Loop Processes	170
Central Control Mechanisms	174
Central Control of Rapid Movements	179
Generalized Motor Programs	199
Summary	211

CHAPTER 7 Principles of Speed and Accuracy 213

Fitts' Law: The Logarithmic Speed–Accuracy Trade-Off	214
Linear Speed–Accuracy Trade-Off (Schmidt's Law)	220
Temporal Speed–Accuracy Trade-Off	223
Central Contributions to the Spatial Speed–Accuracy Trade-Off	230
Correction Models of the Speed–Accuracy Trade-Off	244
Summary	246

CHAPTER 8 Coordination 249

Discrete Tasks	250
Continuous Tasks	262
A Dynamical-Systems Account of Coordination	277
Summary	279

PART III Motor Learning 281

CHAPTER 9 Motor Learning Concepts and Research Methods 283

Defining Motor Learning	283
Measuring Motor Learning	286
Designing Experiments on Learning	291
Using Alternative Methods to Measure Learning	294
Understanding Issues About the “Amount” of Learning	297
Understanding Learning and Performance Variables	300
Summary	300

CHAPTER 10 Conditions of Practice 303

Verbal information	303
Focus of Attention	305
Motivational Influences on Learning	309
Observational Learning	315
Mental Practice	318
Distribution of Practice	320
Variability of Practice	325
Contextual Interference	328
Guidance	338
Summary	339

CHAPTER 11 Augmented Feedback 341

Classifications and Definitions	341
Informational Functions of Feedback	343
Motivational Functions of Feedback	364
Attentional Focus Functions of Feedback	366
Theoretical Issues: How Does Augmented Feedback “Work”?	369
Summary	372

CHAPTER 12 The Learning Process 375

Stages of Motor Learning	375
Closed-Loop Theory	377
Schema Theory	380
Differing Theoretical Perspectives of Motor Learning	385
OPTIMAL Theory	395
Summary	399

CHAPTER 13 Retention and Transfer 401

Fundamental Distinctions and Definitions	401
Measuring Retention and Transfer	403
Retention and Motor Memory	407
Retention Loss	411
Transfer of Learning	421
Summary	431

Appendix 433

Glossary 435
