

## **TABLE OF CONTENTS**

Foreword xi

Preface to the First Edition xiii

Preface to the Second Edition xvi

Some Notes on Nomenclature xix

About the Companion Website xxi

### **1 The Fossil Record 1**

1.1 The Discovery of the Deep Past 1

Changing Ideas About the Changing Earth 1

Neptune vs. Vulcan 2

A Brief Guide to Sedimentology 3

Dating the Rocks 4

The Succession of Faunas 5

Radiation-Based Dating Techniques 7

Other Dating Techniques 9

Dating Based on the Cycles of the Earth 9

The Problem of Orogeny 11

Continental Drift 11

1.2 A Brief History of Life 12

Life: The First Three Billion Years 12

Multicellular Life 14

The Cambrian Revolution 15

Jaws, Fins, and Feet 16

The Reptilian Revolutions 18

The Two Great Extinctions 20

The Mammals Take Over 21

### **2 Analyzing Evolution 23**

2.1 Darwin and Evolution 23

Parsimony and Pigeons 23

Darwin's Theory 24

Improving on Darwin 27

2.2 The Origin of Species 30

What, if Anything, is a Species? 30

The Speciation Process 31  
The Tempo of Speciation 32  
Semispecies, Hybrids, and Isolating Mechanisms 33

2.3 Species Concepts and Classification 35  
Races, Semispecies, and Taxonomy 35  
Other Species Concepts 37  
Morphospecies and Chronospecies 39

2.4 Microevolution and Macroevolution 40  
Is Evolution Smooth or Jerky? 40  
The Neo-Darwinian Synthesis 41  
The Politics of Macroevolution 42

2.5 Reconstructing the Tree of Life 42  
Phylogenetic Inference 42  
Sources of Error in Phylogenetics 44

2.6 Taxonomy and Classification 47  
Linnaean Systematics 47  
Evolutionary Systematics 47  
Phenetics and Cladistics 49  
Pros and Cons of Phylogenetic Systematics 49

### **3 People as Primates 51**

3.1 Primates as Mammals 51  
The First Mammals 51  
Allometry 57  
Allometry and Early Mammals 58  
Death and Molar Occlusion 59  
Allometry, Motherhood, and Milk 60  
Respiration and the Palate 60  
The Tribosphenic Molar 62  
Live Birth and Placentation 64  
Jurassic and Cretaceous Mammals 65

3.2 The Order Primates 66  
What is a Primate? 66

The Living Strepsirrhines 73  
Anthropoid Apomorphies: Ears, Eyes, and Noses 74  
Tarsiers 76  
Platyrrhines: The New World Anthropoids 77  
Cercopithecoids: The Old World Monkeys 78  
Hominoids: The Living Apes 79  
Pongids and Hominids 81  
Bonobos and Chimpanzees 84  
Humans vs. Apes: Skulls and Teeth 85

3.3 The Primate Fossil Record 88  
Primate Origins: The Crown Group 88  
Fossil Primates: The Stem Group 90  
Ancestral Traits and Genetic Evidence 91  
The First Euprimates 92  
Eocene “Lemurs” and “Tarsiers” 94  
The First Anthropoids 96  
Anthropoid Radiations 98  
Miocene Catarrhines 99  
Ape Origins 103  
Cercopithecoids 107

#### **4 The Bipedal Ape 109**

4.1 The Discovery of Australopithecus 109  
Being Human vs. Becoming Human 109  
The Taung Child 109  
Australopithecus Grows Up 111

4.2 The Anatomy of Bipedality 115  
Upright Posture and the Vertebral Column 115  
Bipedality and the Pelvis 116  
Bipedal Locomotion: Knees 118  
Bipedal Locomotion: The Hip Joint 123  
Bipedal Locomotion: Feet 124

4.3 More South African Finds 127  
Australopithecus Stands Up 127  
The Skull of Australopithecus africanus 128

Australopithecus robustus	129
Man-Apes, Just Plain Apes, or Weird Apes?	133
Postcranial Peculiarities	133
4.4 Louis Leakey and Olduvai Gorge	135
4.5 Mio-Pliocene Enigmas	139
Sahelanthropus: The Oldest Hominin?	139
Orrorin	140
Ardipithecus	141
The Burtele Foot	146
4.6 The Genus Australopithecus	146
Australopithecus anamensis?	146
Australopithecus afarensis?	148
Afarensis Skulls and Teeth	152
Australopithecus bahrelghazali?	153
Australopithecus deyiremeda?	153
Kenyanthropus platyops?	154
Early Australopithecus from South Africa	154
Australopithecus prometheus?	155
Australopithecus aethiopicus	156
Australopithecus garhi	158
Australopithecus sediba?	159
Australopithecus boisei	160
Australopithecus robustus: Postcranial Skeleton and Relationships	162
4.7 Australopithecine Phylogeny	163
Alpha Taxonomy and Cladograms	163
Getting Around Cladistics	166
4.8 The Australopithecine Postcranium	167
Down from the Trees – How Far, How Fast?	167
Australopithecine Shoulders	171
Arms vs. Legs	172
The Hominin Hand	173
Australopithecine Vertebrae	174
Hip and Femur	177
Early Hominin Feet	179

Postcranial Diversity in Early Hominins 181

4.9 Ecology and Behavior 183

The Facts Thus Far 183

What Did Australopithecines Eat? 183

Early Hominin Environments 186

Social Ecology 188

4.10 Major Issues: Explaining Hominin Origins 192

## **5 The Migrating Ape 197**

5.1 The Spread of Hominins out of Africa 197

5.2 The Emergence of the Genus Homo 198

Homo habilis and the Habilines 198

Habiline Dates and Stratigraphy in East Africa 203

Habiline Skulls 204

Habiline Teeth and Diets 207

Habiline Postcranial Remains 208

Habiline Taxonomy: The Frustrations of Variation 210

Back to South Africa 211

Advanced Australopithecus or Early Homo? Phylogenetic Issues 212

Early Material Culture 214

A Summary of the Habilines in Eight Questions 215

5.3 Homo erectus 216

An Introduction to Homo erectus 216

A Brief History of Homo erectus: 1889–1950 218

Later Discoveries in Africa and Eurasia 220

Erectine Chronology and Geographic Distribution 222

Asian Homo erectus: The Neurocranium 224

Cranial Capacity and the Brain in Asian Erectines 229

Asian Homo erectus: Faces and Mandibles 230

The Asian Erectine Dentition 232

Asian Erectine Postcranial Remains 233

Early African Erectine Skulls and the Ergaster Question 233

Early African Erectine Postcranial Morphology 237

Early Erectine Adaptations: Anatomy and Physiology 242

Early Erectine Adaptations: The Archaeological Evidence 245  
Patterns of Development and Evolutionary Change in Erectines 247  
Early Erectine Radiations in Africa 248  
Out of Africa I: The First Migration into Eurasia 250  
Dmanisi – The First Eurasians 253  
Indonesian Erectines and the Specter of “Meganthropus” 259  
Chinese Erectines 261  
The Initial Occupation of Europe 262  
Gran Dolina 264

#### 5.4 Peripheral Holdouts along the Continental Margins 267

Flores 267  
Luzon 272  
Dushan 272  
Rising Star 273

#### 5.5 Major Issues: Summing Up the Erectines 275

### **6 The Big-Brained Ape: Middle Pleistocene Variants and Trends 279**

6.1 Homo “heidelbergensis” 279  
Crossing the Rubicon? 279  
“Archaic Homo sapiens” vs. “Homo heidelbergensis” 280  
Brains and Tools in the Middle Pleistocene 282

#### 6.2 Models of Later Human Evolution 284

Changing Origin Narratives 284  
The Piltdown Fraud 285  
RAO and MRE 287

#### 6.3 Regional Variants in Europe and Africa 289

European Heidelbergs 289  
Petralona 290  
Bilzingsleben 293  
Swanscombe 293  
Steinheim 294  
Mauer 295  
Boxgrove 296  
Ceprano 296

Arago (Tautavel) and Lazaret 297

Sima de los Huesos 298

Other European Heidelberg 303

African Heidelberg: Kabwe 304

Bodo and Ndutu 306

African Heidelberg Mandibles 307

Other African Heidelberg 307

North Africans 308

6.4 Asian Heidelberg? 308

Mugharet El-Zuttiyeh 308

Other West Asian Candidates 309

South Asia 309

East Asia 309

6.5 Australasia 311

Sambungmacan 311

Ngandong 312

6.6 Supraorbital Tori, Chins, and Projecting Faces 314

6.7 The African Transition to Modern Humans 316

Background and Dating 316

The African Transitional Group: Vault Morphology 319

The African Transitional Group: Facial Morphology 320

The African Transitional Group: Additional Bones, Archaeology, and Other Matters  
321

6.8 East Asian Archaic Humans 322

Background and Context 322

Dali 324

Harbin 325

Other Chinese Finds 325

East Asian Archaics: Continuity or Someone New? 326

6.9 Major Issues: Speciation, Migration, and Regional Differentiation 327

**7 Talking Apes: The Neandertals 333**

7.1 Changing Ideas about Neandertals	333
Early Discoveries and Interpretations	335
Neandertals – From Boule to the Twenty-First Century	338
7.2 Neandertal Chronology and Distribution	340
7.3 The Neandertal Skull	346
Neandertal Brainscases	346
Neandertal Faces	356
Neandertal Mandibles	359
Neandertal Teeth	362
Prognathism	364
7.4 The Neandertal Body	366
Body Size and Proportions	366
Neck and Upper Limb	369
Lower Vertebrae, Pelvis, and Lower Limb	371
7.5 Neandertal Life History and Demography	374
7.6 Genetics and Genomics	376
The Mitochondrial Genome	376
The Nuclear Genome	378
Genes, Dates, and Lineages	379
Denisovans	380
Ghosts in the Genes	382
7.7 Brains and Behavior	383
Neandertal Brains	383
Neandertal Technology	385
Symbolic Behavior	386
Neandertals and Language	389
Diets and Subsistence Behavior	393
7.8 Neandertal Populations	395
Early European Neandertals	395
Krapina	396
“Würm” Neandertals from Western Europe	398

Western and Central Asian Neandertals 399

Late Neandertals 402

7.9 Major Issues 406

## **8 The Symbolic Ape: The Origins of Modern Humans 411**

8.1 Symbolic Behavior 411

Signs and Symbols 411

A “Creative Explosion”? 412

8.2 Modern Human Anatomy 414

The Modern Skull 414

Cranial Capacity 416

The Postcranial Skeleton 417

8.3 The Fossil Record of Modern Human Origins 418

Geochronology 418

Early Modern Humans: The East African Record 418

Out of (East) Africa: Early Modern People in North and South Africa 421

The First Modern People Outside Africa: The Near Eastern Evidence 424

African and Circum-Mediterranean Gene Flow and Modern Human Origins 430

Modern Human Origins in East Asia 432

The First Australians 437

Europe: A Late Frontier 443

The Initial Upper Paleolithic 444

The Aurignacian and its Makers 445

The Gravettian 450

The Late Entry into Europe 452

Europe: The Morphological Evidence for Continuity 453

8.4 Genetics and Modern Human Origins 455

Genes, Populations, and Migrations 455

Human Self-Domestication? 459

Ancient DNA in Early Modern Humans 460

8.5 Modern Human Origins: The Models vs. the Data 461

The Recent African Origin Model 461

Multiregional Evolution 462

Alternative Views: The Assimilation Model 463

Assimilation and Interactions Between Modern and Archaic Humans 466

Appendix: Cranial Measurements 471

Bibliography 477
