

# **Table of Contents**

**Preface**

**Acknowledgements**

**List of abbreviations**

- 1. Introduction**
- 2. The basis of electrical activity in the neuron**
- 3. The Hodgkin–Huxley model of the action potential**
- 4. Models of active ion channels**
- 5. Modelling neurons over space and time**
- 6. Intracellular mechanisms**
- 7. The synapse**
- 8. Simplified models of the neuron**
- 9. Networks of neurons**
- 10. Brain tissue**
- 11. Plasticity**
- 12. Development of the nervous system**
- 13. Modelling measurements and stimulation**
- 14. Model selection and optimisation**
- 15. Farewell**
