

Table of Contents

1 An Introduction to Animal Behavior

1.1 Natural Selection and the Evolution of Behavior

—1.1.1 The Cost-Benefit Approach

—1.1.2 The Levels of Analysis

—1.1.3 The Integrative Study of Animal Behavior

1.2 Approaches to Studying Behavior

1.2.1 Examining the Adaptive Basis of Behavior

1.2.2 Inferring the Evolutionary History of Behavior

2 The Integrative Study of Behavior

2.1 The Development of Song Learning

—2.1.1 Intraspecific Variation and Dialects

—2.1.2 Social Experience and Song Development

2:Mechanisms of Song Learning

—2.2.1 The Genetics of Song Learning

—2.2.2 The Avian Song Control System

2.3 The Evolution of Song Learning

—2.3.1 An Evolutionary History of Bird Song

—2.3.2 Song Learning: A Comparative Approach

2.4 The Adaptive Value of Song Learning

—2.4.1 Ecological and Social Correlates of Song Learning

—2.4.2 Social Competition and Mate Choice

3 The Developmental and Molecular Bases of Behavior

3:Behavior Requires Genes and the Environment

—3.1.1 Behavioral Ontogeny

—3.1.2 Gene Regulation Influences Behavior

3.2 The Evolutionary Development of Behavior

—3.2.1 The Evo-Devo Approach to Understanding Behavior

—3.2.2 Molecular Toolkits and the Development of Behavior

3.3 The Development of Behavioral Variation

—3.3.1 Early Life Developmental Conditions

—3.3.2 Alternative Behavioral Phenotypes

4 The Neural Basis of Behavior

4:Responding to Stimuli

—4.1.1 Complex Behavioral Responses to Simple Stimuli

—4.1.2 How Moths Avoid Bats

4.2 Sensory Stimuli and Nervous System Control

—4.2.1 Decision Making in the Brain

—4.2.2 Alternative Sensory Modalities 105

4.3 Translating Sensory Stimuli into Behavior

- 4.3.1 Neural Mechanisms of Information Transfer
- 4.3.2 Stimulus Filtering

5 The Physiological and Endocrine Bases of Behavior

5:Endogenous Rhythms and Changing Behavioral Priorities

- 5.1.1 Endogenous versus Exogenous Control of Behavioral Priorities
- 5.1.2 Mechanisms of Changing Behavioral Priorities

5.2 Cues that Entrain Cycles of Behavior

- 5.2.1 Predictable Environmental Cues
- 5.2.2 Unpredictable Environmental Cues

5.3 Hormones and Behavior

- 5.3.1 Activational Effects of Hormones
- 5.3.2 Hormonal Causes and Consequences of Behavior

6 Avoiding Predators and Finding Food

6:Antipredator Behavior

- 6.1.1 Blending In
- 6.1.2 Standing Out
- 6.1.3 Social Defenses
- 6.1.4 Optimality Theory and Antipredator Behavior

6.2 Foraging Behavior

- 6.2.1 Optimal Foraging Theory
- 6.2.2 Landscapes of Fear
- 6.2.3 Cognition and Finding Food
- 6.2.4 Frequency Dependence and Foraging Behavior

7 Territoriality and Movement

7:Where to Live

- 7.1.1 Habitat
- 7.1.2 Selection
- 7.1.3 Territoriality

7.2 To Stay or Go

- 7.2.1 Dispersal
- 7.2.2 Variation in Migratory Behavior and Connectivity 225

8 Principles of Communication

8:Communication and Animal Signals

- 8.1.1 A Communication Framework
- 8.1.2 Functionally Referent Signals

8.2 The Evolution of Animal Signals

- 8.2.1 Preexisting Traits
- 8.2.2 Preexisting Biases
- 8.2.3 Preexisting Traits versus Preexisting Biases

8.3 The Function of Animal Signals

- 8.3.1 Honest Signaling
- 8.3.2 Deceitful Signaling
- 8.3.3 Eavesdropping on Others

9 Reproductive Behavior

9: Sexual Selection and the Evolution of Sex Differences

- 9.1.1 Sex Differences in Behavior and Investment
- 9.1.2 A Reversal in Sex Differences
- 9.2 Intrasexual Selection and Competition for Mates
 - 9.2.1 Competition and Access to Mates
 - 9.2.2 Conditional Mating Tactics versus Alternative Mating Strategies
 - 9.2.3 Sperm Competition
 - 9.2.4 Paternity Assurance
- 9.3 Intersexual Selection and Mate Choice
 - 9.3.1 Female Mate Choice: Direct versus Indirect Benefits
 - 9.3.2 Cryptic Female Choice
 - 9.3.3 Signal Evolution: Runaway versus Chase-Away Sexual Selection
- 9.4 Sexual Conflict
 - 9.4.1 The Manipulation of Female Choice
 - 9.4.2 Sexual Arms Races

10 Mating Systems

10: Monogamy: A Lack of Multiple Mating

- 10.1.1 Why Be Monogamous? 10.1.2 Monogamy and Biparental Care
- 10.2 Polyandry: Multiple Mating by Females
 - 10.2.1 Female versus Male Control of Mating
 - 10.2.2 Indirect versus Direct Benefits 327
- 10.3 Polygyny: Multiple Mating by Males
 - 10.3.1 Female Defense Polygyny
 - 10.3.2 Resource Defense Polygyny
 - 10.3.3 Lek Polygyny
 - 10.3.4 Scramble Competition Polygyny
- 10.4 Polygynandry and Promiscuity: Multiple Mating by Both Sexes
 - 10.4.1 Polygynandry
 - 10.4.2 Promiscuity

11 Parental Care

11: Offspring Value and Parental Investment

- 11.1.1 Parental Care Decisions
- 11.1.2 Parental Favoritism in Offspring Care and Production
- 11.1.3 Family Conflict
- 11.2 To Care or Not to Care

- 11.2.1 Current versus Future Reproduction
- 11.2.2 Sexual Conflict and Parental Care
- 11.2.2 Maternal versus Paternal Care
- 11.3 (Non-)Discriminating Parental Care
- 11.3.1 Offspring Recognition and Interspecific Brood Parasitism
- 11.3.2 Coevolutionary Arms Races
- 11.3.3 The Evolution of Brood Parasitism

12 Principles of Social Evolution

12:Altruism and Levels of Selection

- 12.2.1 Individual versus Group Selection
- 12.2.2 Kin Selection
- 12.2 Kin Selection and Inclusive Fitness Theory
- 12.2.1 Haplodiploidy and the Evolution of Eusociality
- 12.2.2 Inclusive Fitness and Monogamy
- 12.2.3 Sterility and Caste Differentiation
- 12.3 Social Conflict in Animal Societies
- 12.3.1 Reproductive Conflict
- 12.3.2 Consequences of Social Conflict

13 Social Behavior and Sociality

13:Forms of Social Behavior

- 13.1.1 Mutual Benefit
- 13.1.2 Altruism and Reciprocity
- 13.1.3 Selfishness and Spite
- 13.2 The Evolution of Cooperative Breeding
- 13.2.1 Direct versus Indirect Benefits
- 13.2.2 Costs of Breeding Cooperatively
- 13.2.3 Individual Differences in Cooperative Behavior
- 13.3 Reproductive Conflict
- 13.3.1 Social Organization and Reproductive Skew
- 13.3.2 Reproductive Suppression and Senescence
