

Table of Contents

Chapter 1: Studying the Nervous System

Unit 1: Neural Signaling

Chapter 2: Electrical Signals of Nerve Cells

Chapter 3: Voltage-Dependent Membrane Permeability

Chapter 4: Ion Channels and Transporters

Chapter 5: Synaptic Transmission

Chapter 6: Neurotransmitters and Their Receptors

Chapter 7: Molecular Signaling within Neurons

Chapter 8: Synaptic Plasticity

Unit 2: Sensation and Sensory Processing

Chapter 9: Vision

Chapter 10: Hearing

Chapter 11: The Vestibular System

Chapter 12: Touch and Proprioception

Chapter 13: Pain and Temperature

Chapter 14: Olfaction

Chapter 15: Taste

Unit 3: Movement and Its Central Control

Chapter 16: Lower Motor Neuron Circuits and Motor Control

Chapter 17: Upper Motor Neuron Control of the Brainstem and Spinal Cord

Chapter 18: Modulation of Movement by the Basal Ganglia

Chapter 19: Modulation of Movement by the Cerebellum

Chapter 20: Eye Movements and Sensorimotor Integration

Chapter 21: The Visceral Motor System

Unit 4: The Changing Brain

Chapter 22: Early Brain Development

Chapter 23: Construction of Neural Circuits

Chapter 24: Experience-Dependent Plasticity in the Developing Brain

Chapter 25: Sex Differences and Neural Circuit Development

Chapter 26: Repair and Regeneration in the Nervous System

Unit 5: Complex Brain Functions and Cognitive Neuroscience

Chapter 27: Cognitive Functions and the Organization of the Cerebral Cortex

Chapter 28: Cortical States

Chapter 29: Attention

Chapter 30: Memory

Chapter 31: Speech and Language

Chapter 32: Emotion

Chapter 33: Thinking, Planning, and Deciding
