I didn't find any emails sent from Turnitin in my email inbox, what can I do?

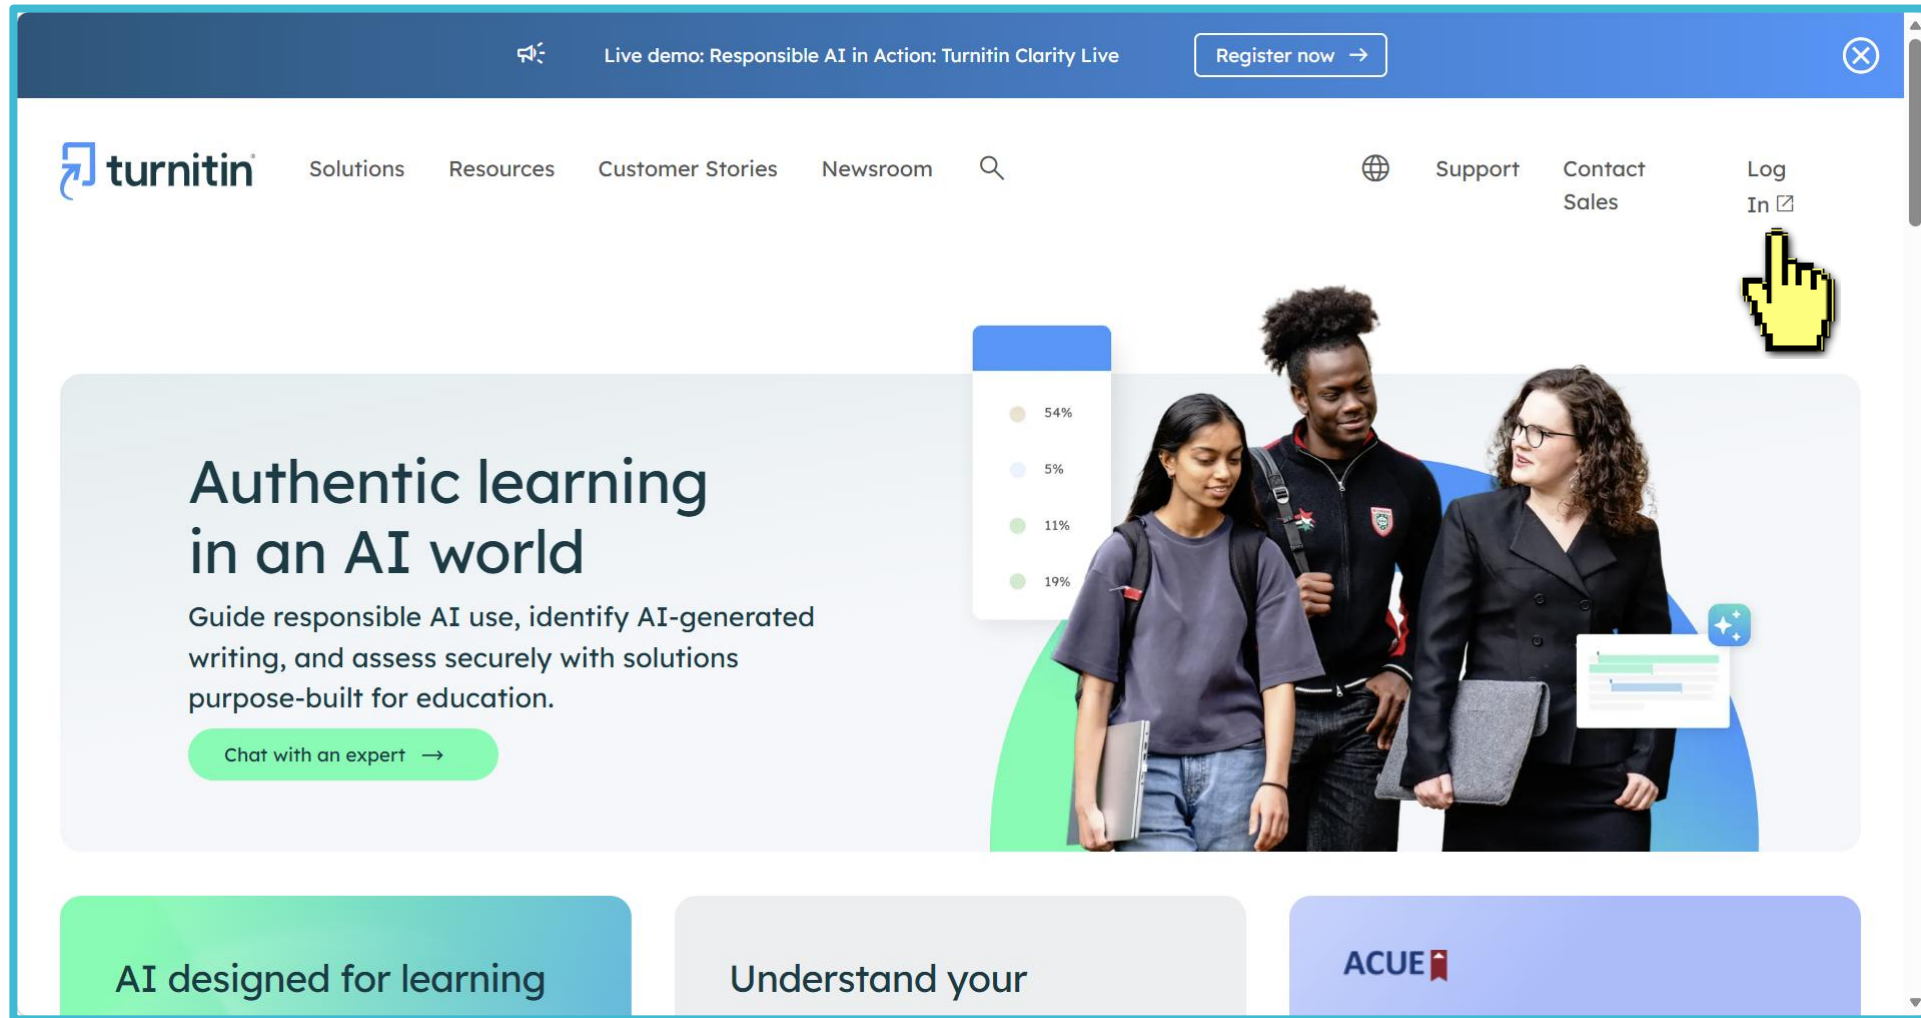

Follow '**Resetting Your Password**' steps to activate your account. If you have any questions, please contact LSL staffs.

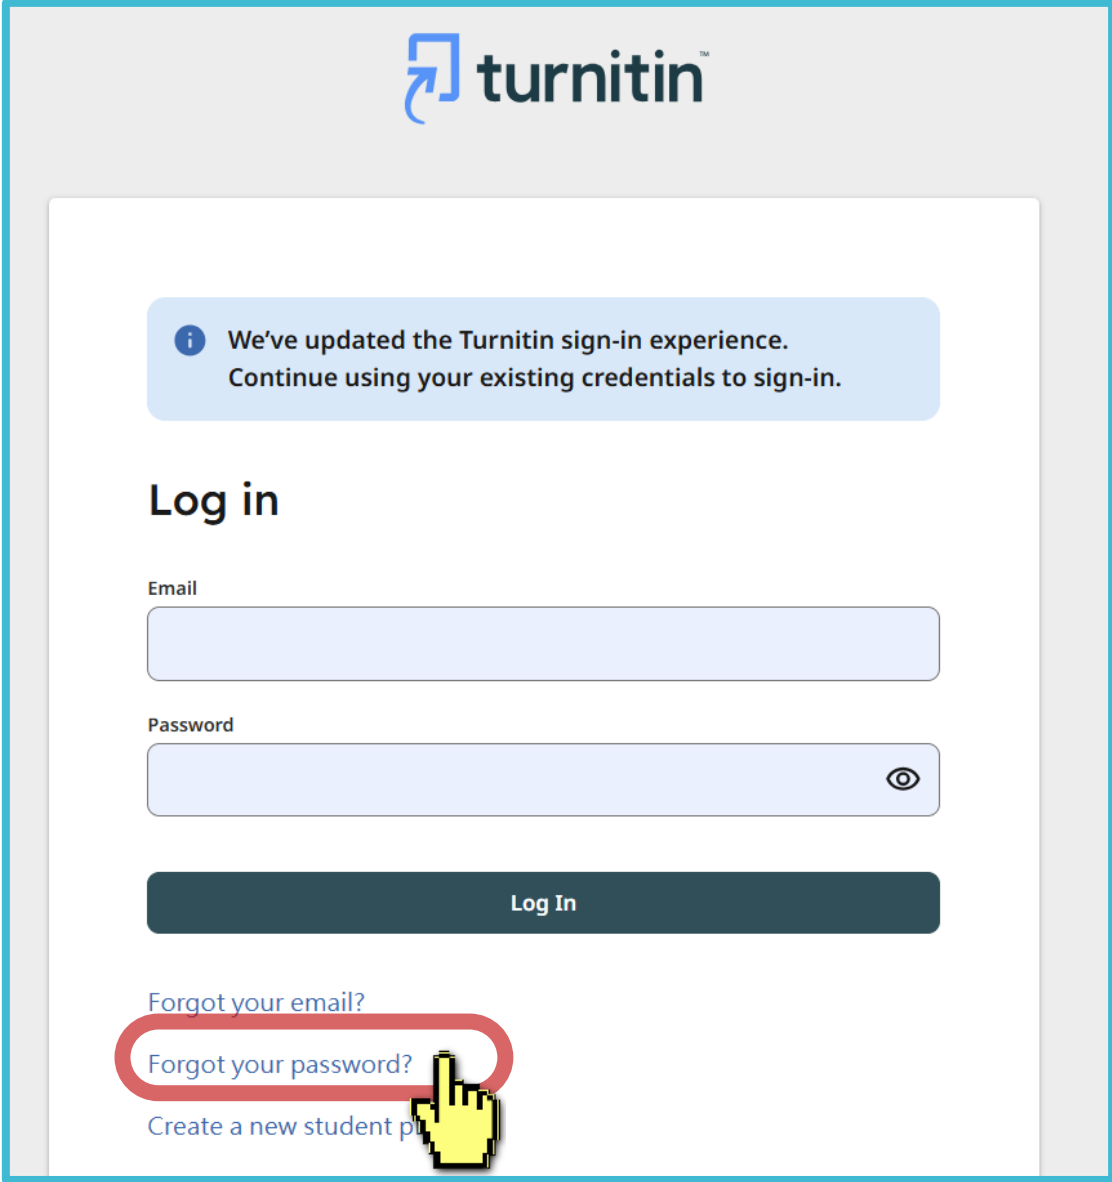

2. Resetting Your Password

If you have forgotten your password, follow these steps.

Go to www.turnitin.com
Click at 'Log in' on the top right of the page.

Select '**Forgot your password?**' to reset your password.

The image shows the Turnitin login page. At the top is the Turnitin logo. Below it is a light blue information box with an 'i' icon and the text: "We've updated the Turnitin sign-in experience. Continue using your existing credentials to sign-in." Below this is the "Log in" heading. There are two input fields: "Email" and "Password". The "Password" field has an eye icon on the right. Below the fields is a dark blue "Log In" button. At the bottom, there are three links: "Forgot your email?", "Forgot your password?", and "Create a new student p". The "Forgot your password?" link is circled in red, and a yellow hand cursor is pointing at it.

1. The color and the percentage only indicates **the portion of your text that are similar with the content indexed in Turnitin database.**
2. **These indices do not reflect Turnitin's assessment of whether a paper has or has not been plagiarized.** It is required human judgement. Please consult with your advisor.

Paper Title	Uploaded	Grade	Similarity
Final_Academic_Integrity_in_the_age_of_AI.docx	10/03/2026 11:41 PM	--	 41%   
			

Viewing the matches

The overall similarity is a percentage **showing how much text from the submission matches to sources in the database**. Turnitin calculates this percentage by **dividing the number of matching words by the total number of words in the document**.

Artificial Intelligence (AI) is revolutionizing education by enhancing personalized learning experiences and streamlining administrative tasks. Through adaptive learning systems, AI can assess individual student's strengths and weaknesses, tailoring instructional content to meet their unique needs. This personalized approach ensures that students receive targeted support, whether they require additional help in specific areas or advanced materials to challenge their abilities. Moreover, AI-powered tools like intelligent tutoring systems and educational chatbots provide immediate feedback and assistance, fostering a more engaging and effective learning environment.

Furthermore, AI in education promotes accessibility to accommodate diverse learning styles and needs. For example, speech technologies assist students with disabilities in participating in classroom activities. Language translation tools break down language barriers, enabling a more inclusive learning environment. As AI continues to advance, its integration into education promises to create more equitable opportunities for all students, fostering a future where everyone has access to high-quality, personalized education.

Each match is numbered and color-coded.

The screenshot displays the Turnitin interface. At the top, there are icons for Download, Details, and Help. The main section shows a 41% Overall Similarity score, highlighted with a blue box. Below this, there are tabs for Match Groups and Sources. A toggle switch for 'Show overlapping sources' is visible. A list of matches is shown, with the first three matches highlighted by a blue rounded rectangle. Each match is numbered and color-coded: 1 (pink), 2 (purple), and 3 (blue). The matches are: 1. Publication: LeBrun, Pamela. "Faculty Barriers t... 6% (1 text block, 48 matched words); 2. Student papers: Griffith College Dublin 6% (1 text block, 47 matched words); 3. Internet: www.turnitin.com 5% (1 text block, 43 matched words). A blue arrow points from the text box 'Each match is numbered and color-coded.' to the first match in the list.

Match Number	Source Type	Source Name	Similarity	Text Blocks	Matched Words
1	Publication	LeBrun, Pamela. "Faculty Barriers t...	6%	1	48
2	Student papers	Griffith College Dublin	6%	1	47
3	Internet	www.turnitin.com	5%	1	43

Report View: Sources

The screenshot shows the Turnitin 'Report View: Sources' interface. On the left, a document snippet is visible with a blue callout box asking 'What is Overlapping Sources?' and explaining that similar text within multiple sources will display the source with the most matched words first. Another blue callout box points to the 'Show overlapping sources' toggle, which is currently turned off. The right panel shows a '41% Overall Similarity' summary with tabs for 'Match Groups' and 'Sources' (the latter is highlighted with a red box). Below the toggle, a list of sources is shown, with the top three (LeBrun, Pamela, Griffith College Dublin, and www.turnitin.com) highlighted by a blue rounded rectangle. The bottom of the screen shows document metadata: 'Techniques for Preserving Academic Honesty', 'Page 1 of 3', '753 words', and a zoom level of '135%'.

7 The integration of Artificial Intelligence (AI) into education presents a multitude of potential and difficulties, none more essential than the preservation of academic integrity, as we stand at the intersection of technological innovation and academic achievement. In a time when technology is pervasive and information is readily available, the conventional definitions and standards of academic integrity are constantly being challenged. This essay sets out to investigate the complicated terrain of academic integrity in the AI era, illuminating the intricacies, moral conundrums, and revolutionary possibilities that arise at the nexus of human intelligence and technological prowess.

Furthermore, new chances to improve academic integrity through creative fixes and proactive interventions are presented by the development of AI. A proactive, inclusive, and sustained culture of integrity is being paved over by educational institutions as they create advanced detection mechanisms and pedagogical interventions. Through the use of AI in education, instructors may enable students to develop their critical thinking, ethical reasoning skills, and a more profound comprehension of academic conventions. This will enable students to navigate the intricate digital terrain with honesty and responsibility. In the pages that follow, we delve into the nuances of academic integrity in the age of AI, examining its implications for students, educators, and institutions alike. Through a multidisciplinary lens that encompasses ethics, education, technology, and policy, we seek to unravel the intricate tapestry of challenges and opportunities that define this evolving landscape, ultimately advocating for a holistic approach that prioritizes integrity, innovation, and the pursuit of knowledge in its purest form.

Furthermore, AI in education promotes accessibility and inclusivity by providing resources that accommodate diverse learning styles and needs. For instance, speech-to-text and text-to-speech technologies assist students with disabilities, ensuring they can participate fully in classroom activities. Language translation tools break down barriers for non-native speakers, enabling a more inclusive learning environment. As AI continues to advance, its integration into education promises to create more equitable opportunities for all students, fostering a future where everyone has access to high-quality, personalized education.

Techniques for Preserving Academic Honesty

Academic institutions should also use AI technology to improve their systems for academic monitoring and plagiarism detection. Institutions can effectively identify cases of academic misconduct and discourage dishonest behavior from students by including AI-powered plagiarism detection technologies into their assessment processes. But it's crucial to find a middle ground between protecting students' privacy rights and using AI for monitoring.

In summary

The screenshot displays the Turnitin interface. On the left, a document is shown with two paragraphs. The first paragraph is marked with a pink exclusion icon (1) and contains text about ChatGPT's impact on educators. The second paragraph is marked with a blue exclusion icon (3) and contains text about AI tools empowering teachers. The bottom of the document shows a bibliography section.

On the right, the sidebar displays the overall similarity score: **35% Overall Similarity**. Below this, there is a link to **4 Exclusions** with a right arrow, highlighted by a yellow hand cursor. The sidebar also shows two tabs: **Match Groups** and **Sources**. A toggle switch for **Show overlapping sources** is present. The **Sources** tab is active, showing a list of excluded sources:

- Publication** (1 icon): LeBrun, Pamela. "Faculty Barriers t..." (6% similarity). 1 text block, 48 matched words.
- Student papers** (2 icon): Griffith College Dublin (6% similarity). 1 text block, 47 matched words.
- Publication** (3 icon): Sonu Dua, Sakshi Dua, Pawanpreet ... (5% similarity). 6 text blocks, 37 matched words.
- Internet** (4 icon): (0% similarity).

At the bottom of the sidebar, there is a blue circular icon with a right arrow. The bottom of the document shows a footer with page information: **Page 2 of 3**, **753 words**, and a search bar showing **135%**.

❌ The functions for excluding material are approximate. Human judgement is the final arbiter for proper quotation or bibliographic reference.

create advanced detection mechanisms and pedagogical interventions. Through the utilization of AI in education, instructors may enable students to develop their critical thinking abilities, ethical reasoning skills, and a more profound comprehension of academic conventions. This will enable students to navigate the intricate digital terrain with honesty and responsibility. In the pages that follow, we delve into the nuances of academic integrity in the age of AI, examining its implications for students, educators, and institutions alike. Through a multidisciplinary lens that encompasses ethics, education, technology, and policy, we seek to unravel the intricate tapestry of challenges and opportunities that define this evolving landscape, ultimately advocating for a holistic approach that prioritizes integrity, innovation, and the pursuit

» **Could you tell me what percentage of Similarity score given by Turnitin is appropriate?**

In my case, I got 19% from Turnitin, is it OK?

Turnitin is a Tool Detecting Text Similarities.

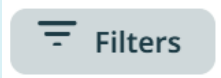

The similarity score is NOT the plagiarism indicator.
Human interpretation is always required.

High Similarity Score ≠ Plagiarism

It may include **false positives**. False positives could be:

- » 1. Terms usually used in your field, grammatical terms, the names, affiliations, methods and methodology.
- » 2. Reference list, properly cited and/or quoted text or text for which permission has been received.
- » 3. Your own published paper or work stored in the Student Paper database.

Consult Your Instructor on Enhancing the Original Writing.

Rewrite the text. Or you may use the filter  to reduce the similarity score. Your instructor can also help you permanently exclude certain sources from the report.

'No Magic Number'

Based on the above circumstances, it is difficult to clearly define an ideal similarity score.

The best approach is to discuss the appropriate criteria with your department or your instructor/advisor.

Or you can refer to the publishing policy of publishers and journals. EX: IEEE.

The slide features a light blue border. In the top-left corner, there are several overlapping teal and orange squares. In the bottom-right corner, there are overlapping green and teal shapes.

5. Downloading the Similarity Report

Downloading Similarity Report

1 Artificial Intelligence (AI) is revolutionizing education by enhancing personalized learning experiences and streamlining administrative tasks. Through adaptive learning systems, AI can assess individual student's strengths and weaknesses, tailoring instructional content to meet their unique needs. This personalized approach ensures that students receive targeted support, whether they require additional help in specific areas or advanced materials to challenge their abilities. Moreover, AI-powered tools like intelligent tutoring systems and educational chatbots provide immediate feedback and assistance, fostering a more engaging and effective learning environment.

2 Furthermore, AI in education promotes accessibility and inclusivity by providing resources that accommodate diverse learning styles and needs. For instance, speech-to-text and text-to-speech technologies assist students with disabilities, ensuring they can participate fully in classroom activities. Language translation tools break down barriers for non-native speakers, enabling a more inclusive learning environment. As AI continues to advance, its integration into education promises to create more equitable opportunities for all students, fostering a future of personalized education.

Frequent Asked Questions

» **1. I have been waiting for several hours but my similarity report is still “processing”?**

1 Confirm the assignment setting with your instructor. Instructors may check the guidance [here](#).

If you still can't see your report, please contact LSL staff along with your screenshot.

2 If your paper

- contains lots of graphics and formulas
- is large to dozens of MBs
- has several hundred pages length

it will take comparatively longer to generate the report.

3 If you submitted papers to the same assignment **more than 3 times**, you have to wait for **24 hours**.

Consult your instructor for creating new assignment folders for you, to get similarity report within 24 hours.

» 2. I got a high similarity score, and the first matches are my previous drafts, what can I do?

-Match to Your published works: Paraphrase + Use the exclusion tool

-Match to drafts or assignment works stored in the database:

The instructor of that class can request for the permanent deletion of indexed papers

How did the instructor upload the papers?

❶ Via **Quick Submit**

Select the paper(s) and click at "**Request permanent deletion**" in the inbox.

❷ Via **Assignment folders**:
The inadvertently stored papers **are in the inbox**

1. Select the paper(s) and click at "**Request permanent deletion**" in the inbox.
2. Change the assignment setting to "**No Repository**"

❸ Via **Assignment folders/Quicksubmit**:
The inadvertently stored papers **are deleted** from the inbox

Reaching out to tiisupport@turnitin.com.
Request for the reinstation of the deleted content.

The Turnitin Administrator (Library) will receive your request .

If they approve your request and delete the paper, you will receive a message in your Turnitin message inbox.
(No email notifications)

After the paper(s) were deleted

For instructors

1. Confirm the assignment settings had been changed to "**No Repository**" for not storing new papers in the database.
2. Ask the student to resubmit again.

For students:

Student may resubmit the paper, the high similarity match should be removed.
