

# Mendeley Introduction

Social & academic collaboration network and Reference Manager

鄭薇薇 Weiwei Cheng  
Marketing Manager, Elsevier Taiwan

# What is Mendeley

Mendeley improves your research workflow by...

...helping you promote your  
research expertise

宣傳您的研究專長

...allowing you to create a  
centralized reference collection

讓您集中收集文獻資料

...simplifying the writing process

簡化論文寫作流程

...enabling you to securely  
organize your references

讓您安全的組織與管理  
文獻

...providing a space to connect and  
collaborate with your contacts

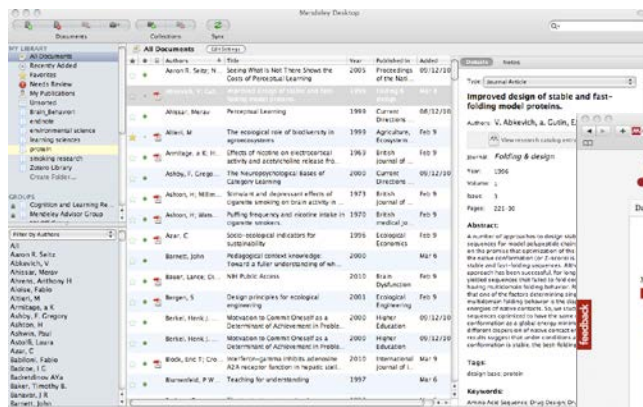

提供空間與您的夥伴合作

...helping you record knowledge  
and share ideas

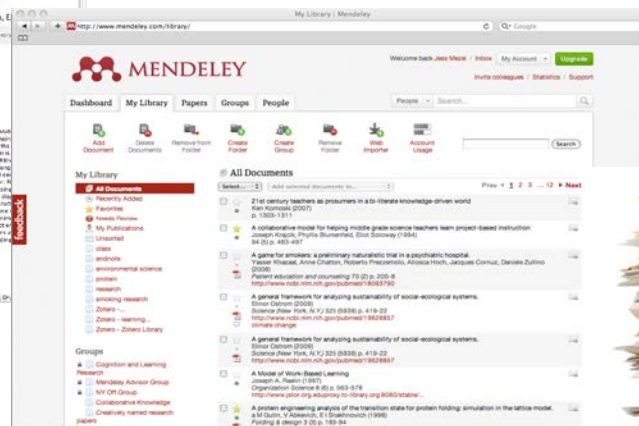

幫助您紀錄知識和分  
享想法

**Mendeley - A Last.fm For Research?**

Authors: V. Henning, J. Reichelt

 View research catalog entry for this paper

Journal: 2008 IEEE Fourth International Conference on eScience

Year: 2008

Volume:

Issue:

Pages:

**Abstract:**

This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last.fm" (www.last.fm), can be applied to research, which potential it could have in the world of research (e.g. an open and interdisciplinary database, usage-based reputation metrics, and collaborative filtering) and which challenges such a model would face in academia. A real-world application of these principles, "Mendeley" (www.mendeley.com), will be demoed at the IE...

# Organize your papers

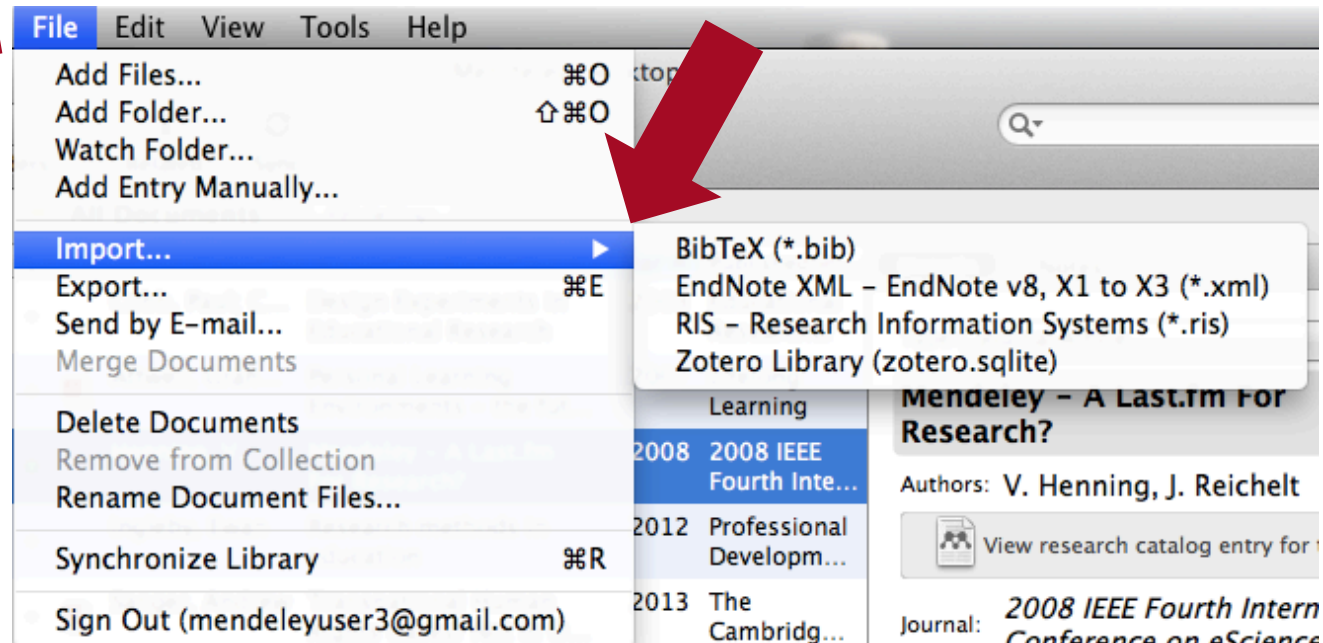

## Add Papers

Import your existing references into Mendeley (different format :BibTex, Endnote, RIS or Zotero)

Add papers

Add papers into a folder

Add papers manually

You can also import :

- Use Web Importer to import paper found in web or database
- Search papers in Mendeley Research Catalog

## Organize your paper

- Mendeley pulls out relevant data from a paper but sometimes data maybe missing.
- Mendeley will add something data for you by providing data like DOI, PubMed, ArXivID...
- Manually add data

## Single paper

Journal: *Folding & design*

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

**Abstract:**

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

## How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

Save to Mendeley

Can't see your Bookmarks Bar?

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

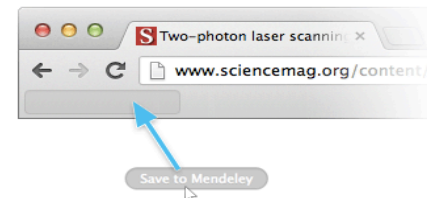

3. Click the "Save to Mendeley" bookmark

Click the "Save to Mendeley" bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

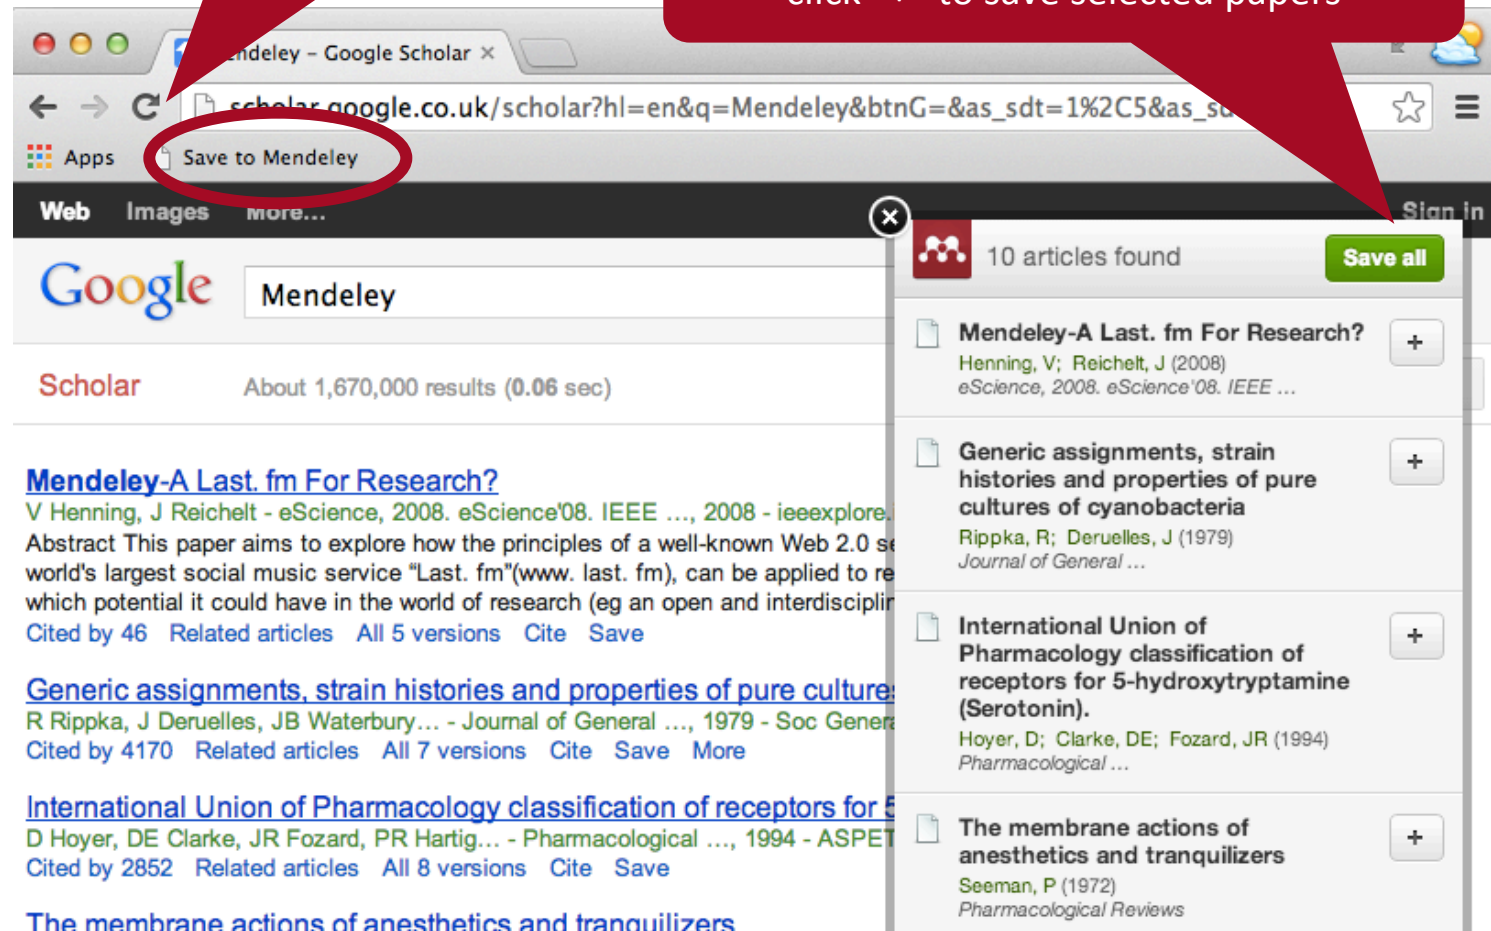

## Use Web Importer

With the Mendeley Web Importer, you can easily save references and PDF files into your personal library.

On a web page, click on  
“Save to Mendeley”  
button

Click on “Save all” to save all papers or  
click “+” to save selected papers

The screenshot shows a Google Scholar search results page for the query "Mendeley". The search results include three articles: "Mendeley-A Last. fm For Research?", "Generic assignments, strain histories and properties of pure cultures of cyanobacteria", and "International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin)". A Mendeley Web Importer overlay is visible on the right side of the page, showing a list of the same three articles. The overlay has a "Save all" button and a "+" button next to each article. A red circle highlights the "Save to Mendeley" button in the browser's address bar. A red callout box points to the "Save all" button in the overlay.

**Abstract:**

Graphene is the two-dimensional (2d) building block for carbon allotropes of every other dimensionality. It can be stacked into 3d graphite, rolled into 1d nanotubes, or wrapped into 0d fullerenes. Its recent discovery in free state has finally provided the possibility to study experimentally its electronic and phonon properties. Here we show that graphene's

### Abstract

UNLABELLED: As advances in life sciences and information technology bring profound influences on bioinformatics due to its interdisciplinary nature, bioinformatics is experiencing a new leap-forward from in-house computing infrastructure into utility-supplied cloud computing delivered over the Internet, in order to handle the vast quantities of biological data generated by high-throughput experimental technologies. Albeit relatively new, cloud computing promises to address big data storage and analysis issues in the bioinformatics field. Here we review extant cloud-based services in bioinformatics, classify them into Data as a Service (DaaS), Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS), and present our perspectives on the adoption of cloud computing in bioinformatics.

REVIEWERS: This article was reviewed by Frank Eisenhaber, Igor Zhulin, and Sandor Pongor.

# Mendeley Suggest on web

The screenshot shows the Mendeley Suggest web interface. At the top, there is a navigation bar with the Mendeley logo on the left and several menu items: Feed, Library, Suggest (highlighted with a red box), Stats, Groups, Data, Search, a notification bell, and a user profile for Weiwei. Below the navigation bar, the page is divided into two main sections. The first section, titled "Based on all the articles in your library", displays three article suggestions. Each suggestion includes the article title, author(s), year, and a list of actions: "Save reference", "Get full text at journal", and "Share reference with followers". The second section, titled "Most recently added to your library", also displays three article suggestions with the same layout and actions. The interface is clean and modern, with a light gray background and blue accents for links and icons.

## Manage My Library

The screenshot shows the Mendeley Desktop application window. The interface includes a menu bar (File, Edit, View, Tools, Help), a toolbar with icons for folders, related items, and sync, and a search bar. The left sidebar contains a 'MY LIBRARY' section with options like 'All Documents', 'Recently Added', 'Favorites', 'Needs Review', 'My Publications', 'Unsorted', and 'The Lancet'. Below this is a 'GROUPS' section with 'Create Group...'. A 'Filter by Authors' dropdown is set to 'All', showing a list of authors including Attwell, Graham, Bailey, Charles W., Cobb, Paul, Collins, Maria, Confrey, Jere, Cryer, Emma, DiSessa, Andrea, Eysenbach, Gunther, Henning, V., Ingleby, Ewan, Lancet, The, and Lehrer, Richard. The main pane displays a table of documents under the 'All Documents' tab. The table has columns for 'Authors', 'Title', 'Year', and 'Publisher'. The right pane shows details for a selected document, including 'Type: Web Page', 'Import citations into your digital library using the Mendeley Web Importer | Mendeley', 'Authors: The Mendeley Support Team', 'Publication: Mendeley Desktop', 'Year: 2011', 'Pages: 1-16', and 'Abstract: Introduction to Mendeley. Learn how to create your personal digital library, organize and annotate documents, how to share with colleagues, and create citations and bibliographies. Author Keywords: Mendeley; academic research; academic software; academics; bibliography; digital library; how-to; library management; library software; reference software; research paper; research'.

Annotations (red callouts) point to specific features:

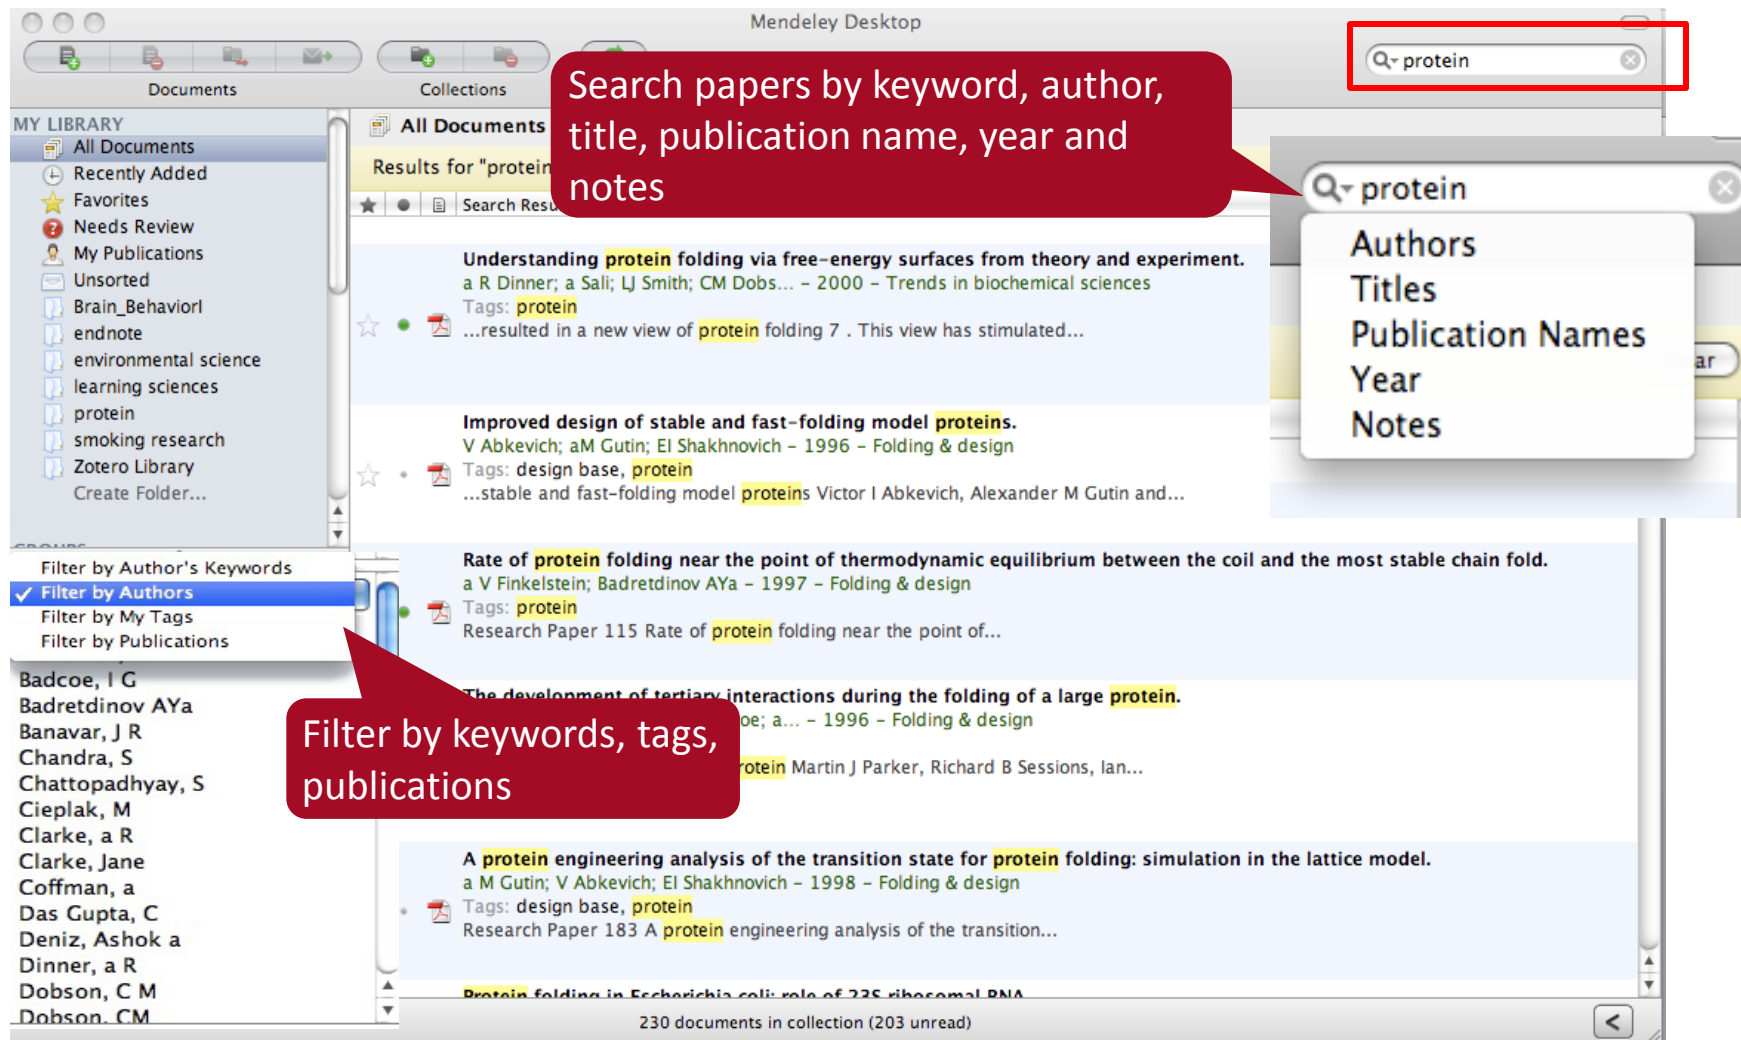

- Add a folder**: Points to the 'Create Folder...' option in the 'MY LIBRARY' sidebar.
- Read/unread paper**: Points to the star icon in the document list.
- Add to my favorite**: Points to the star icon in the document list.
- Open a PDF file**: Points to the PDF icon in the document list.
- Show different file format (pdf, .pptx, .docx, excel...etc)**: Points to the document list.

## Search & Filter your papers

The screenshot displays the Mendeley Desktop application window. The top toolbar includes a search icon and a search bar containing the text "protein". A red box highlights the search bar, and a red callout bubble points to it with the text: "Search papers by keyword, author, title, publication name, year and notes".

On the left side, the "MY LIBRARY" pane shows a list of documents. Below this, the "Filter by" section is visible, with "Filter by Authors" selected. A red callout bubble points to this section with the text: "Filter by keywords, tags, publications".

The main pane displays search results for "protein". The results list includes titles, authors, and tags. For example, the first result is "Understanding protein folding via free-energy surfaces from theory and experiment." by a R Dinner; a Sali; LJ Smith; CM Dobs... from 2000, with the tag "protein".

On the right side, a dropdown menu is open, showing the following options: Authors, Titles, Publication Names, Year, and Notes.

At the bottom of the window, a status bar indicates "230 documents in collection (203 unread)".

## Create groups (Mendeley Desktop)

## Share paper and add annotation

The screenshot shows the Mendeley Desktop application window. The main pane displays a PDF of a paper titled "A game for smokers: A preliminary naturalistic trial in a psychiatric hospital". The paper's abstract, keywords, and introduction are visible. The right-hand pane shows a list of annotations for this paper, each with a date and time, and a brief description of the annotation. Two red callout boxes highlight specific features: one points to the "Share a full-text paper" button and another points to the "Add annotation with different colors" button.

**Share a full-text paper**

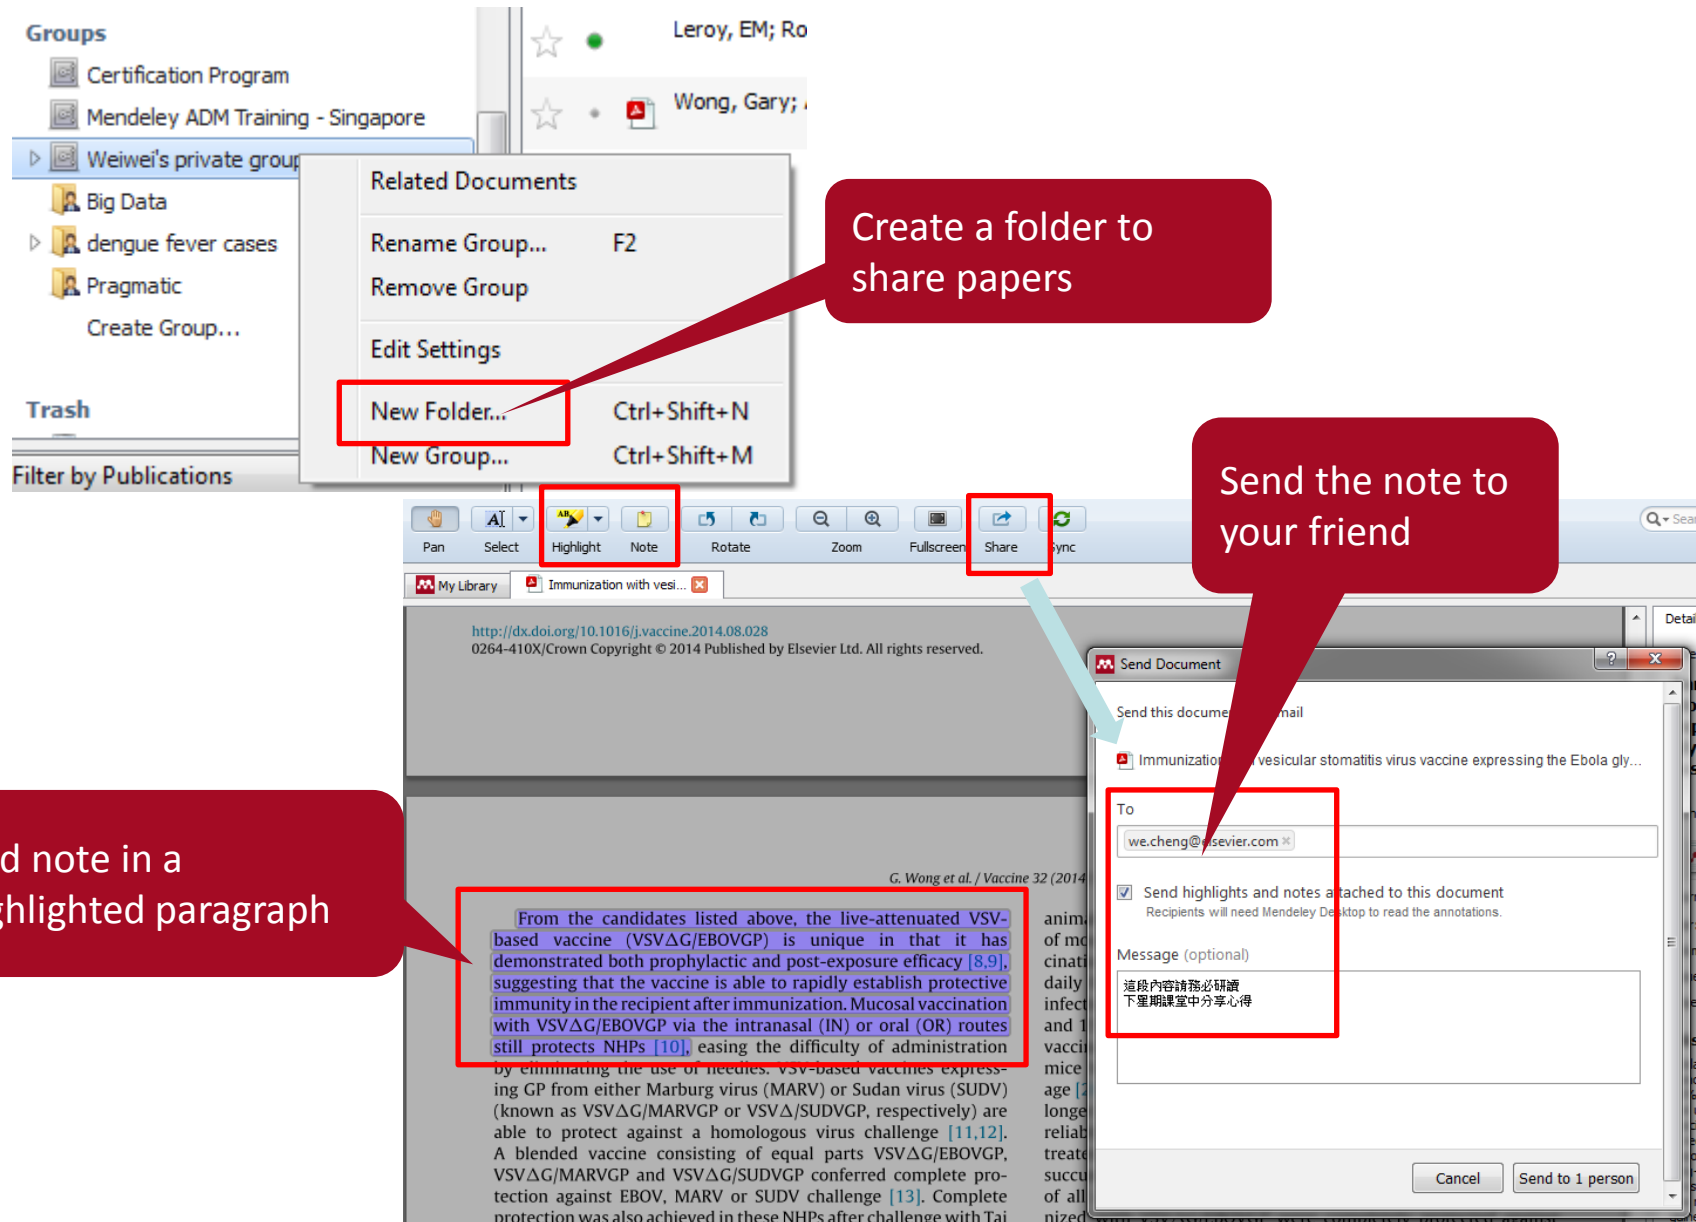

**Add annotation with different colors**

**Annotations:**

- 05/04/11 5:50 PM: interesting separating parts of the abstract...
- 06/04/11 5:46 PM: feasibility of game toward behavior

**Page 1 of 4**

# Share paper in the private group

The screenshot illustrates the Mendeley Desktop interface with several key actions highlighted:

- Groups Panel:** A list of groups is shown on the left, including "Weiwei's private group". A context menu is open for this group, with the "New Folder..." option highlighted. A red callout bubble points to this option with the text: "Create a folder to share papers".
- Document View:** The main window displays a document titled "Immunization with vesicular stomatitis virus vaccine expressing the Ebola gly...". A paragraph of text is highlighted in blue. A red callout bubble points to this text with the text: "Add note in a highlighted paragraph".
- Share Button:** The "Share" button in the toolbar is highlighted with a red box. A red callout bubble points to it with the text: "Send the note to your friend".
- Send Document Dialog:** A dialog box titled "Send Document" is open, showing the document title and a list of recipients. The "To" field is filled with "we.cheng@mendeley.com". The checkbox "Send highlights and notes attached to this document" is checked. A red callout bubble points to the "Message (optional)" field, which contains the text: "這段內容務必研讀 下星期課堂中分享心得".

### Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according to the ...

# Different Groups

The screenshot displays three Mendeley groups. Red boxes highlight specific features: 'Join group' and 'Follow group' for the first group; 'INSTITUTION' for the second; and 'Ask to join group' and 'Follow group' for the third. Red callout boxes provide context: 'Open group' points to the first group, 'MIE' points to the 'INSTITUTION' tag, and 'Invite-only group' points to the 'Ask to join group' button.

### About

Dr. Victor Henning is the CEO & Co-Founder of Mendeley and Vice President of Strategy at Elsevier. After launching Mendeley in 2008, he led its growth into a research platform with 3.5 million users in 180 countries and institutional customers including Harvard, Stanford, and MIT. In 2013, Mendeley was acquired by Elsevier, the world's leading provider of science and health information.
