Taylor & Francis eBooks

A WORLD OF KNOWLEDGE AND INFORMATION

Introducing Taylor & Francis' New Advanced & Accessible eReader!

A new and enhanced eReader for Taylor & Francis ebooks has been launched. Previously, our platform offered two eReader options, for basic or advanced features. Responding to feedback, our **new eReader** combines into one application the full range of features, including personalization, powerful search and offline access, and enhancements to support students and researchers.

The new and enhanced eReader offers the following features:

Ability to download in ePub, providing an enhanced offline reading experience.

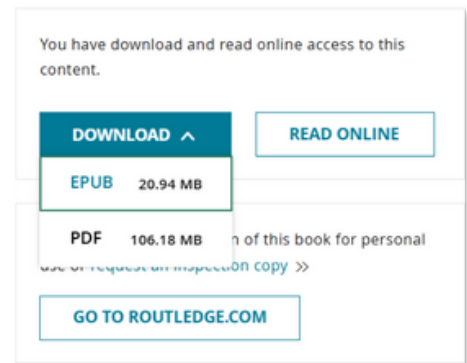

Facility to change font sizes and styles, enabling users to personalize for their specific reading needs.

Read aloud functionality, available in multiple languages, providing an audio book option

Additional tools for students and researchers, such as integration with reference management software.

The updated eReader can access it by choosing the 'Download' option for any book on **taylorfrancis.com**

The older versions of eReader (e.g. via the 'read online' button) will be retired on **16 February 2025**.
