Introduction to L&B Digital Library

- L&B Digital Library is an comprehensive eBook database, and covers almost 100,000 titles in Chinese and foreign languages from the topics includes Arts & Humanity, Social Science, Science, Technology and Medicine.

- The Whole eBooks are in the pure e-file format and available to search complete content. The users can read by on-line & off-line to enjoy more comfortable eBook reading experiences.
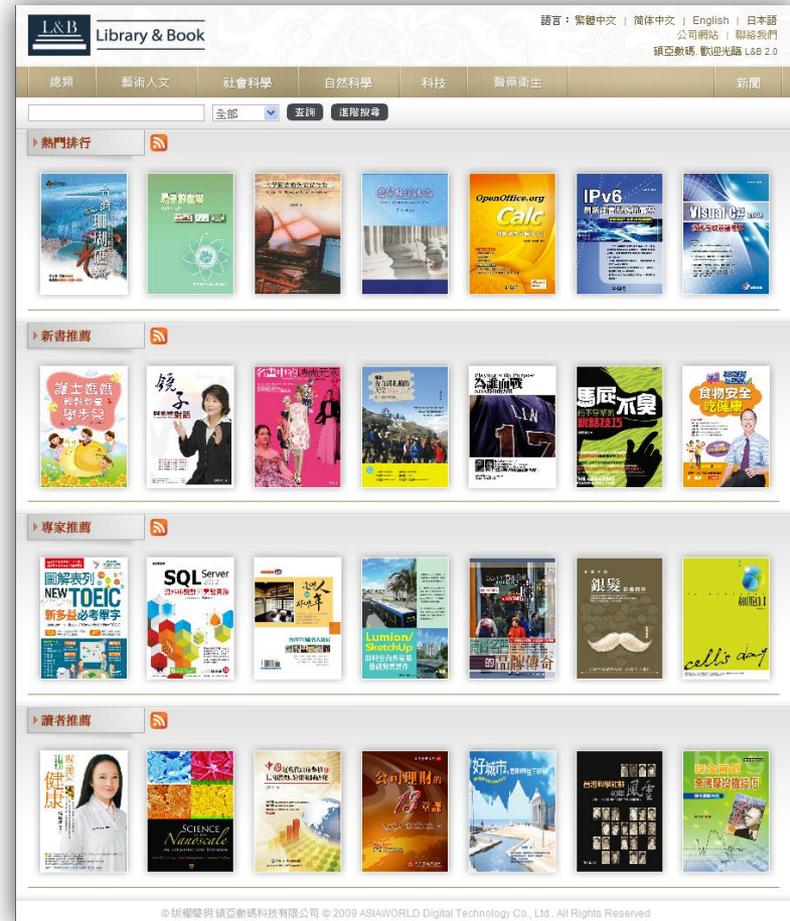

Features

The digital contents covered in this system are accompanied by legal copyrights and without any copyright infringement issues. This system is user-friendly and provide you complete personal library service features.

➢ Platform Technology

(Flash Format)

1. The teachers and students are able to recommend the designated texts to the librarians to evaluate through the **Featured** functions of the platform, and publish the **News** to promote the events and advance reading & researching.

2. The **Six Topics Classifications** & **Personal Library Service** from this platform enable the users quickly browse the table of contents of each E-book and connect with context to read.

L&B Library & Book

Features

The digital contents covered in this system are accompanied by legal copyrights and without any copyright infringement issues.   This system is user-friendly and provide you complete personal library service features.

➢ **Contents are all in pure e-file format and searchable in full-text.**

Two Reading Modes

【Download】Offline Reading

You can download and install **Smart Reader** to your desktop/notebook/mobile devices APP(IOS system) under authorization in order to offline read and manage downloaded bibliographic information in 30 days. The users also can save time, improve the accuracy rate of information-searching and effectively advance the quality for academic researches and themes-discussions with marking functions include chapter index navigation, full-text searching, scripts-citing and underline.

【Online Reading】Connected Reading

# Illustrations to [Reading Area] Classification-Changing

Select the specific topic of classification, and then click ⊕ button in the left side to the name of topic.

Choose one item or more items that will be changed to the different classification.

Click "Done" button to change the classification that the eBooks exit.

Note: Press "Done" button to return to status of selecting readings in the process of [classification-changing] and [title-deleting].

Illustrations to [Reading Area] Title-Deleting
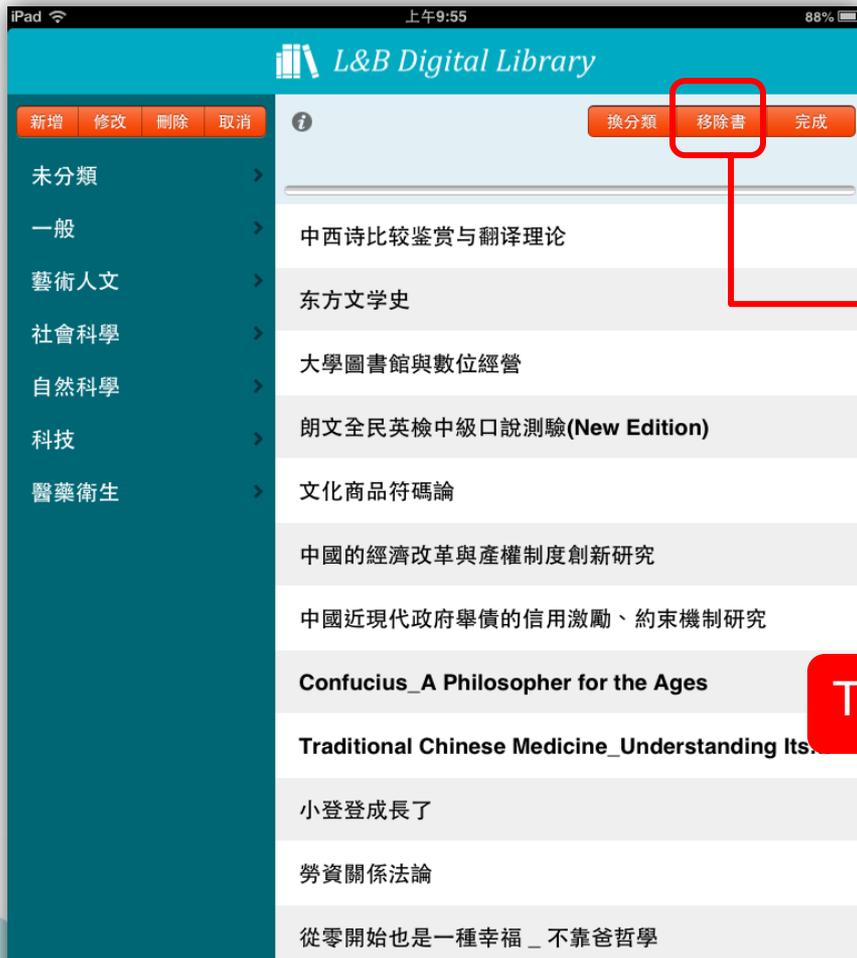

The sign is rotated.

Click "Delete" button to delete the eBook.

Note: Press "Done" button to return to status of selecting readings in the process of [classification-changing] and [title-deleting].

eBook-Reading Interface

> ➢ Mobile devices APP(IOS system version) allows the eBooks to read, choose table of contents, preview thumbnail images, auto-rotate, zoom in/out, and click to read.

> ➢ The preview thumbnail images will show in the below side of the eBook window.

> ➢ Click the page to hide or display the above toolbar and preview thumbnail images area.

Notes:

➢ The features of Info Configuration cover [Selection of Languages] and [Connection with 3G].

➢ [Connection with 3G]:

- The defaulted value is [Negative] in order to avoid the excessive 3G usage-cost for the users.

- The users who use WIFI or unlimited 3G credit can choose [Connection with 3G] to increase the speed of programs.

Notes:

➢ The minimum available hardware space is 2GB for eBooks-downloading and offline-reading.

➢ If the available hardware space is more than 2GB, then you can delete the eBooks that you do not want to read and other program files.

➢ According to the rules relate to intellectual property rights, the users can **download the eBooks to offline-read for 30 days**, and the users will receive a prompt about the [term to become due]. If the users want to continue to access the eBooks, then the users just return to the eBooks platform re-click [download] to postpone the reading term for another 30 days without deleting the eBooks.
